ABOUT HVAFARC

The team at Hunter Valley Animal Facility & Rehoming Centre (HVAFARC) combine over 15 years of rescue knowledge, commitment and passion. The team are from all walks of life, breed specific rescues and all breed rescues ensuring that the knowledge and experience base is extremely high.

As we reach our third anniversary we are reaching out to members of our community to help us continue to change the lives of animals in the Hunter Valley region. HVAFARC is not only building a new animal shelter but one that will be a community center focused on animal welfare. HVAFARC will be devoted to training, community outreach, educational programs, rehabilitation and re-homing.

HVAFARC GOALS & OBJECTIVES

➤ **Increase the number of animals saved**

We are currently undergoing the process of rebuilding kennels on the block of land HVAFARC currently in habits, more kennels will allow us to save more lives. Our goal is to have our kennels as environmentally friendly as possible to reduce our impact on the Hunter Valley Region.

➤ **Build Quarantine area at HVAFARC**

Quarantine is a critical aspect for all new animals arriving at HVAFARC. Quarantine protects everyone from possible infectious diseases that may not be producing visible symptoms in a healthy-looking animal on arrival.

➤ **Support the community through Last Litter Program**

As part of our ongoing commitment to the community whenever a litter of puppies is surrendered to HVAFARC we desex the mother before returning to her owners to prevent more unwanted litters.

➤ **Support the community through Microchipping Program**

A large number of animals come through the pound system due to lack of microchips, two of our team are currently undergoing training to microchip animals so we can assist the community in ensuring their animals will be quickly returned to them should they go missing

➤ **Food Bank Program for Local Animals**

Due to our ongoing relationship with PetBarn we regularly receive large donations of animal feed, we distribute this to our rescue partners in the area as well as individuals who are doing it tough.
